

Formula Student Netherlands 2025

Alumni Event

Formula Student Netherlands will organize a small event for Alumni Cup Cars. Due to limited availability of facilities, personnel and restrictions within the time schedule the event has been downscaled. Though, it should provide an exciting opportunity to test the alumni cars in three dynamic events. Besides running in dynamics, alumni are kindly requested to assist with some event tasks.

A summary of events can be found below;

Technical Inspection (Safety only)

- Saturday 09:00-13:00

Static Events:

No Static Events (BPP/C&M/ED)

Dynamic Events:

Tuesday

- o Skid Pad 14:30-15:00

- Afternoon: Dynamic Runs at Autocross
- Evening: -

Thursday

On Thursday Catering (Lunch & Dinner) for Marshalls will be included

- Morning: Marshalling at Endurance Event
- Afternoon: Marshalling at Endurance Event

Technical Regulations

The key focus is on safety rather than on rules compliance. The aim of the event is to have a safe and fun experience. During the safety inspection, only safety critical elements will be assessed to determine whether a vehicle is considered safe to race. A vehicle does not have to be 100% rule compliant with current or previous regulations.

The safety inspection will be combined with a training session for new scrutineers during FSN2025. The safety inspection will result in a verdict of the lead scrutineers whether the car is deemed safe to drive. During dynamic events, all regular regulations apply for driving and safety standards.

Alumni Team Members can not be part of a participating team in FSN2025, nor can they be a judge. They can be scrutineers, but alumni will never be allowed to scrutineer or influence any decision their former active team(s).
