No.	Checkpoint	Checkbox	Comment			
	- Accumulator container to be used during the event					
	- Accumulator Container Hand Cart					
	- Charger					
	Tools needed for (dis-)assembly of Accumulator Container					
	- Laptop and cables to display data of the AMS					
-	Print-out of Rule Request (if applicable)	ſ				
-	- An ESO must attend	ſ				
-	Pictures of accumulator internals, if necessary	ſ				
	Datasheets for used wiring, insulation materials, tractive system components and container					
	material with needed values highlighted NOT ON A CELL PHONE					
	- Samples of all wire types used inside the accumulator container					
-	- Samples of all used accumulator container material	ſ				
-	Power Supply for AIL/TSAL test					
	SAFETY BRIEFING					
No.	Checkpoint	Checkbox	Comment			
-	No jewelry, no rings	ı				
-	No cell phone					
-	No batch / no necklace					
-	No sources of distraction					
-	- Do not wear synthetic clothes					
-	- Wear safety glasses					
-	- Wear safety gloves (if necessary)					
	BASIC SET OF HV-PROOF TOOLS					
No.	Checkpoint	Checkbox	Comment			
1	Insulated cable shear					
2	Insulated screw drivers					
3	Insulated spanners, if applicable					
	Multimeter with protected probe tips					
5	Two 4mm banana plug test leads (600V CAT III)					
	SAFETY EQUIPMENT					
No.	Checkpoint	Checkbox	Comment			
	Face shield					
	Safety glasses (minimum three)					
	B HV Insulating gloves (minimum two pairs)					
	HV insulating blankets (two) (min 1m²) with label or serial number and datasheet	T T				
	SELF DEVELOPED PCBS					
No.	Checkpoint	Checkbox	Comment			
	Ask for fully assembled spare PCB of self developed PCBs inside accumulator container	CHECKBOX	Common			
	Sufficient spacing regarding system voltage and implementation					
	Sufficient insulation and temperature rating of coating if used, datasheet available					
	Coating process according to datasheet					
	The 1 min AC RMS isolation test voltage is ≥ 3x max. TS voltage					
	The condition college of the impletion begins if appointed in the detector of in higher than the					
14	maximum TS voltage					
	HAND CART					
No.	Checkpoint	Checkbox	Comment			
	Hand cart has four wheels					
	Hand cart has maximal dimensions of 1200mm x 800mm					
	Hand cart has always on type brake system					
	Hand cart can easily be moved if brake is released					
	The accumulator must be mechanically fixed to the handcart while on the handcart					
	The accumulator must be protected from vibrations and shocks					
	Firewall made from rigid fire retardant material	T D				
	-					
22	Firewall (same width as hand cart, from lowest point to 30 cm above TSAC/handle, transparent above 1.3m from the ground) must protect the operator					

	23	Label according to EV5.3.8 on the firewall below 1.3m from the ground		
		CHARGER ASSEMBLY		
No.		Checkpoint	Checkbox	Comment
	24	Completely closed (no open TS connections), test with probe (100mm length, 6mm diameter)		
	25	Interlock integrated		
	26	TSMP integrated		
	27	Red emergency shutdown button integrated ≥24mm diameter		
	28	TSAL indicator integrated. Must be hard-wired electronics		
		Switches, plugs and indicators must be labeled		
	30	TS wiring is orange, marked with gauge, temperature rating >85°C and voltage rating		
	31	Conductive parts of charging equipment and accumulator are connected to protective earth (PE) while charging		
	32	Conductive parts are grounded according to EV 3.1		
	33	Charger and accumulator casing made of at east 0.5 mm thick electrically conductive material		
	•	or electrically insulated material Connect the accumulator to the charger. Check if no voltage is present		
	34	Check the grounding according to EV 3.1		
		DIS-CHARGE CIRCUIT AND BODY PROTECTION RESISTORS		
No.		Checkpoint	Checkbox	Comment
	•	Switch off Charger. Measure resistance between TS+ and TS- measuring points		
	35	Resistance is 30 k Ω + discharge resistor		
	36	Body protection resistor power and voltage rating is sufficient		
	37	Resistor derating was considered for Power Rating		
		ACCUMULATOR HOUSING		
No.		Checkpoint	Checkbox	Comment
	38	Vehicle number, university name and ESO phone number(s) written on a high contrast background		
	0	Roman Sans-Serif characters of at least 20mm high are used		
	39	Warning stickers with side length of 100mm and text "Always Energized" and "High Voltage" (if	П	
	40	TS >60 V) installed. (Triangle with black lightning bolt on yellow background) Check if all parts and the cover/lid of the housing are rigidly fastened		
		Open container housing, remove maintenance plugs		
		Check if no voltage is present		
		ACCUMULATOR CONTAINER MATERIALS AND CELL STACK		
No.		Checkpoint	Checkbox	Comment

63	Every container contains at least two appropriately sized and rated isolation relays		
64	Pre-charge relay is of mechanical type with appropriate voltage rating		
0-	Isolation relays and fuses are separated from the cells by a barrier without holes according		
65	UL94-V0, FAR25 or equivalent		
66	Holes in container only for wiring harness, ventilation, cooling or fasteners if mechanical		
00	Holes in container only for wiring harness, ventilation, cooling or fasteners if mechanical properties are not influenced		
67	Holes in the accumulator must not cover more than 25% of the surface of the wall		
68	Any covers over the holes must be fire retardant		
69	External openings not pointing towards hand cart operator		
	Maintenance plugs are located at both poles of each stack (including first and last stack)	- i	
	Maintenance plugs removable without tools		
	Maintenance plugs have positive locking mechanism		
	Maintenance plugs must not be able to unintentionally create circuits or short circuits		
74	Stacks separated by maintenance plugs <120VDC and <6MJ		
75	Check opening in TS enclosures, try to reach TS potentials with insulated test probe (100mm		
70	length, 6mm diameter) If fully closed, an equalizing valve must be implemented		
70	WIRING		
No.	Checkpoint	Checkbox	Comment
	·		Continent
	All TS wires have proper overcurrent protection		
	No other wires than TS wires are orange	<u> </u>	
	Securely anchored to withstand at least 200N, if outside of enclosure		
80	Located out of the way of possible snagging or damage		
	TS and LV wires separated (not valid for Interlock)		
82	Every wire used in the Accumulator container (TS and LV) is rated for maximum		
	1S voltage]	
83	TS wires are marked with gauge, temperature rating >85°C and voltage rating		
84	Positive locking mechanism or if no positive locking possible, automotive certified		
	components Check if insulated tools needed for the assembly of certified components are		
>	available		
85	Insulation is not only insulating tape or rubber-like paint		
	One IMD ground line is connected to the accumulator container	- i	
	-	H	
	One IMD ground line is connected to the charger casing by a separate wired connection		
00	IMD connected to vehicle side of the AIRs INDICATOR LIGHT OR VOLTMETER
